PROFILE

An energetic, highly motivated, fast-learning and committed professional with over five years of experience working in IT business. Working with other team members to deliver high quality service on time, ensuring customer satisfaction. Some of my skills are:

- Product oriented and fast learning
- Great communication skills, both in technical and non-technical environment.
- Team player and problem solver
- Bilingual: English and Spanish
- Experienced in **embedded systems** (ARM/Intel Linux based devices), back-end processes (**NodeJS**), DB querying, design and administration (**MongoDB**, **Redis**, **MySQL**) and front-end development (**PHP**, **HTML5**, **CSS3**, **Sass**, **Bootstrap**, **AngularJS**, **jQuery**, **JavaScript**).

PROFESSIONAL EXPERIENCE

Solutions Architect

Case on IT

August 2013 – Present day

Responsible of the design and development of a Big-Data-based system that aim to measure the user IT experience across its digital life (mobile and landline).

Involved in the development of every component of this system since its early phase: its autonomous measurement devices (embedded systems), back-end services and processes and front-end tool.

Main used technologies: **NodeJS**, **MongoDB**, **Linux Scripting**, **HTML5**, **CSS3**, **PHP**, **JavaScript**, **AngularJS**, **Git**

As the development team has been increasing, I have become leader of this department, evolving my role to management tasks (up to 5 people in the team + contractors' relations) and coding at the same time.

Enterprise Applications Consultant

Deloitte

February 2011 – August 2013

Customer business needs analysis, design and implementation of IT solutions.

Collaborated in the following projects:

- Controlling module implementation in an ERP for a Real Estate company (**SAP FI/CO**)
- Consolidation & Forecasting tool with ETL extraction from an ERP for a Construction enterprise (**BPC/BW**)
- Treasury module configuration for a Services company (**SAP FSCM**)
- IT departments processes analysis and consolidation proposal for an important Construction group
- Business information dashboard designed and implemented in a reporting tool for an Infrastructures group (**QlikView**), defining and implementing ETL from **SAP BPC** database - MS edition (**SQL**).

Network protocols testing environment implementation

Universidad de Granada

April 2009 – July 2009

Internship at *Signal, Telematics and Communications Department* in University of Granada (ETSIIT, Granada).

Laboratory design and configuration for network protocols analysis. During this project, I had to design and develop a custom sniffing application to fit initial requirements.

Main used technologies: **Linux Scripting and Configuration, Java**
